

A new design with your safety and security in mind

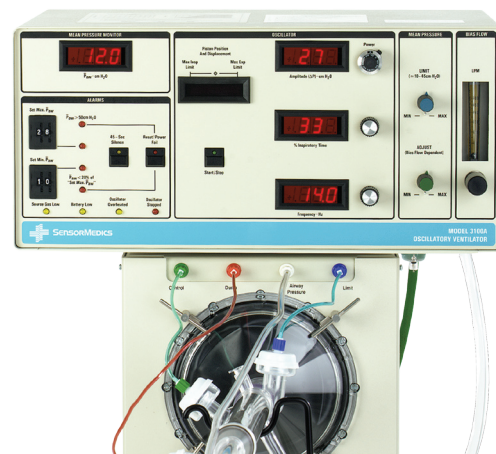

Critical Care Ventilation

Introducing the 3100A HFOV Filtered Circuit Kit

The HEPA filtration element filters the inspired and expired gas to 0.3 microns. With a 99.9999+% bacterial and viral efficiency rating and a DOP filtration efficiency of 99.998%, you can be assured you are providing the best environment for your staff and patients.

Each case comes with four circuits with a heated wire to help reduce condensation, cap diaphragms and an inspiratory and expiratory filter.
