

A new design with your
safety and security in mind

Critical Care Ventilation

Introducing the 3100B HFOV Filtered Circuit

The HEPA filtration element filters the inspired and expired gas to 0.3 microns. With a 99.9999+% bacterial and viral efficiency rating and a DOP filtration efficiency of 99.998%, you can be assured you are providing the best environment for your staff and patients.

Each case comes with four circuits with dual limb heated wire to help reduce condensation, cap diaphragms and an inspiratory and expiratory filter.
